## Emergency Medical Technician-Basic

The Emergency Medical Technician-Basic is trained to provide basic emergency medical care to emergency patients. They are skilled in all levels of Basic Life Support (BLS) procedures. On successful completion of the course, students can work in hospitals, trauma centres, ambulances and range of other healthcare institutions.

**Eligibility** : 10+2  
**Duration** : 6 Months  
**Certification** : BSDM/HSSC/NSDC

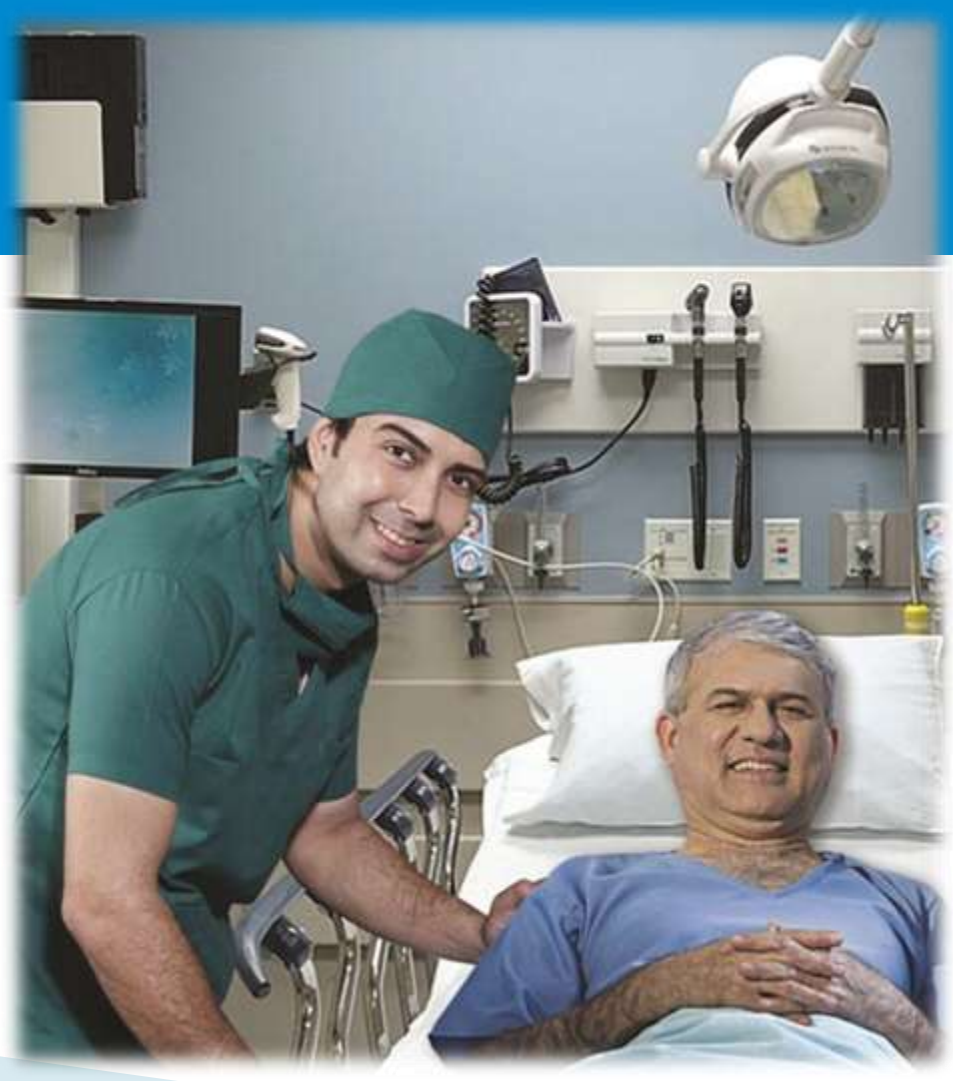

## Dialysis Technician (DT)

A Dialysis Technician is a trained technician that maintains and operates the equipment used for dialysis, a process that cleanses the blood of metabolic waste products. There is a huge demand for well-trained dialysis technicians with expertise in not only handling machines but also medical emergencies that may arise during dialysis.

**Eligibility** : 10+2

**Duration** : 6 Months

**Certification** : BSDM/HSSC/NSDC

## Phlebotomy Technician (PT)

Phlebotomy Technicians are an important part of clinical laboratory team. They are responsible for obtaining blood and various other clinical specimens from the patients. On successful completion of the course, students can work in hospitals, blood banks, physician offices or in independent labs.

- Eligibility** : 10+2 with Science
- Duration** : 4 Months
- Certification** : BSDM/ HSSC/ NSDC

## General Duty Assistant (GDA)

General Duty Assistants support the nursing staff of a hospital or other healthcare provider. Their job is to maintain hygiene levels to a certain standard and assist the nurse/doctor in discharging their duties. On successful completion of the course, students can work in nursing homes, home healthcare and hospitals.

- Eligibility** : 10<sup>th</sup> Pass
- Duration** : 4 Months
- Certification** : BSDM/NSDC/ HSSC

# Medical Laboratory Technician (MLT)

Medical Laboratory Technicians are important members of any clinical laboratory team. Laboratory technicians collect fluid, tissue and blood samples to perform a variety of tests. They generally work under the supervision of a pathologist. Medical Laboratory Technicians may work in hospitals, diagnostic labs, blood banks and medical clinics.

- Eligibility** : 12<sup>th</sup> Pass I.sc
- Duration** : 12 Months
- Certification** : BSDM/NSDC/ HSSC

# X-Ray Technician

X-Ray Technicians are trained to use X-Ray equipment for creating images of a patient's internal anatomy. These images are used by doctors and specialists to aid in the diagnosis of illnesses and injuries.

**Eligibility** : 12<sup>th</sup> Pass

**Duration** : 12 Months

**Certification** : BSDM/NSDC/ HSSC

# Blood Bank Technician

Blood bank technicians, also called phlebotomy technicians, work in a lab under the guidance of a medical or clinical laboratory technologist or manager. Technicians collect, label and prepare blood, plasma and other components for transfusions. In addition, blood bank technicians consistently interact with the public, conducting interviews and testing samples to screen potential donors.

- Eligibility** : 10+2(Sci)Pass
- Duration** : 04Months
- Certification** : BSDM/NSDC/ HSSC

# Home Health Aid

The Home Health Aide program is designed to deliver training to students for providing individualized healthcare to the convalescents, elderly or the people with disabilities by visiting their homes. The Home Health Aide course aims at providing extensive medical/physical care to these patients than their families can provide.

**Eligibility** : 10Pass  
**Duration** : 04Months  
**Certification** : BSDM/NSDC/ HSSC
